**FCI-Standard N° 97**

**GERMAN SPITZ, INCLUDING KEESHOND AND  
POMERANIAN**

(Deutscher Spitz, inklusive Keeshond und Pomeranian)

This illustration does not necessarily show the ideal example of the breed.

**TRANSLATION:** C.Seidler / Version originale: (DE).

**ORIGIN:** Germany.

**DATE OF PUBLICATION OF THE OFFICIAL STANDARD:**  
17.01.2013.

**UTILIZATION:** Watch and Companion Dog.

**FCI-CLASSIFICATION:** Group 5 Spitz and primitive types.  
Section 4 European Spitz.  
Without working trial.

**BRIEF HISTORICAL SUMMARY:** German Spitz are descendants of the stone age « Peat Dogs » (Torfhund) « Canis familiaris palustris Rüthimeyer » and the later Lake Dweller's (Pfahlbau) Spitz; they are the oldest breed of dog in Central Europe. Numerous other breeds have been produced from them. In non-German speaking countries Wolfsspitz are known as Keeshonds and Toy Spitz as Pomeranians.

**GENERAL APPEARANCE:** Spitz breeds are captivating on account of their beautiful coats, made to stand off by plentiful undercoat. Particularly impressive is the strong, mane-like collar round the neck (ruff) and the bushy tail carried boldly over the back. The foxy head with alert eyes and the small pointed, closely set ears give the Spitz his unique characteristic, cheeky appearance.

**IMPORTANT PROPORTIONS:** The ratio of height at withers to body length is 1 : 1.

**BEHAVIOUR AND CHARACTER:** The German Spitz is always attentive, lively and exceptionally devoted to his owner. He is very teachable and easy to train. His distrust to strangers and lack of hunting instinct make him the ideal watchdog for home and farm.

He is neither timid nor aggressive. Indifference to weather, robustness and longevity are his most outstanding attributes.

## **HEAD**

**CRANIAL REGION:** The Spitz's medium size head, seen from above, appears broadest at the back and tapers in wedgeshape to the tip of the nose.

**Stop:** Moderate to marked, never abrupt.

### **FACIAL REGION:**

**Nose:** The nose is round, small and pure black, dark brown in brown Spitz.

**Muzzle:** The muzzle is not overlong and stands in pleasing proportion to the skull. (In Wolfspitz/Keeshond, Giant Spitz and Medium-size Spitz the ratio length of the muzzle to length of the skull is approximately 2:3, in Miniature Spitz and Toy Spitz approximately 2:4.).

**Lips:** The lips are not exaggerated, close fitting to the jaws and do not form any folds to the corner of the mouth. They are completely black in all colours, brown in brown Spitz.

**Jaws/Teeth:** The jaws are normally developed and show a complete scissor bite with 42 teeth, corresponding to the teeth formula of the dog, i.e. the upper teeth closely overlapping the lower teeth and set square to the jaws. In Miniature-and Toy (Pomeranian) Spitz the lack of a few premolars is tolerated. Pincer-bite is permissible in all varieties of the **German** Spitz.

**Cheeks:** The cheeks are gently rounded, not protruding.

**Eyes:** The eyes are of medium size, longish shape, slightly slanting and dark. The eyelids are black in all shades of colour, dark brown in brown Spitz.

**Ears:** The small ears are set high and relatively close to each other, triangular and pointed; they are always carried upright, stiff at the tips.

**NECK:** The medium length neck is set broadly into the shoulders, slightly arched without throatiness and covered by a thick, profuse coat forming a large ruff.

### **BODY:**

**Topline:** The topline starts at the tips of the erectly carried prick-ears and merges in a gentle curve with the short, straight back. The bushy, sweeping tail, which partially covers the back, rounds off the silhouette.

**Withers / Back:** The high withers drop imperceptibly into the shortest possible, straight, firm back.

**Loin:** Short-coupled, broad and strong.

**Croup:** The croup is broad and short, not falling away.

**Chest:** The deep chest is well sprung, the forechest well developed.

**Underline and belly:** The brisket reaches as far back as possible; the belly has only a slight tuck up.

**TAIL:** The tail is set on high and of medium length. It reaches upwards and rolls forward over the back, straight from the root. It lies firmly over the back and is covered with very bushy hair. A double curl at tip of tail is tolerated.

### **LIMBS**

#### **FOREQUARTERS:**

**General appearance:** Straight, rather broad front.

**Shoulder:** The shoulder-blade is long and well laid back. The shoulder is well muscled and firmly connected to the brisket.

**Upperarm:** The upper arm, which is approximately the same length as the shoulder-blade, forms an angle of 90 degrees to the shoulder-blade.

**Elbow:** The elbow joint is strong, close fitting to the brisket and turns neither in nor out.

**Forearm:** The forearm is of medium length in relation to the body, sturdy and completely straight. The back of the forearm is well feathered.

**Metacarpus (Pastern):** The strong, medium length front pastern stands at an angle of 20 degrees from the vertical.

**Frontfeet:** The frontfeet are as small as possible, round and closed, so called cat feet, with well arched toes.

Toe-nails and pads are black in all shades of colour, but dark brown in brown dogs.

### **HINDQUARTERS:**

**General appearance:** The hindquarters are very muscular and abundantly feathered to the hocks. The hind legs stand straight and parallel.

**Upper and lower thigh:** Upper and lower thigh are of about equal length.

**Stifle (knee):** The stifle joint is strong with only moderate angulation and is turned neither in nor out in movement.

**Hock / hock joint:** The hock is of medium length, very strong and vertical to the ground.

**Hind feet:** The hind feet are as small as possible, tightly closed with well arched toes, so called cat feet. The pads are coarse. The colour of nails and pads is as dark as possible.

**GAIT/MOVEMENT:** The German Spitz moves straight ahead with good drive, fluid and springy.

**SKIN:** The skin covers the body tightly without any wrinkles.

### **COAT**

**Hair:** The German Spitz has a double coat : Long, straight, stand off top coat and short, thick, cotton-wool-like undercoat. Head, ears, front side of front and hind legs and the feet are covered by short, thick (velvety) hair. The rest of the body has a long rich coat. Not wavy, curly or corded, not parted on the back. Neck and shoulders are covered by a thick mane. The backside of the front legs is well feathered, the hind legs have ample feathering from croup to hocks. The tail is bushy.

Colour:

a) Wolfsspitz/Keeshound : Grey shaded.

This illustration does not necessarily show the ideal example of the breed.

b) Giant-Spitz: Black, brown, white.

This illustration does not necessarily show the ideal example of the breed.

- c) Medium size Spitz: Black, brown, white, orange, grey-shaded, other colours.

This illustration does not necessarily show the ideal example of the breed.

d) Miniature Spitz: Black, brown, white, orange, grey-shaded, other colours.

This illustration does not necessarily show the ideal example of the breed.

- e) Toy Spitz/Pomeranian: Black, brown, white, orange, grey-shaded, other colours.

This illustration does not necessarily show the ideal example of the breed.

Black Spitz: In the black Spitz, the undercoat and skin must also be black and the colour on top must be a shining black without any white or other markings.

Brown Spitz: The brown Spitz should be uniformly dark brown.

**White Spitz:** The coat should be pure white without any trace of yellow in particular, which often occurs, specially on the ears.

**Orange Spitz:** The orange Spitz should be evenly coloured in the medium colour range.

**Grey-shaded Spitz Keeshond / Keeshond:** Grey-shaded is a silver grey with black hair-tips. Muzzle and ears dark in colour; round the eyes well defined «spectacles» shown as a delicately pencilled black line slanting from outer corner of eye to lower corner of ear, coupled with distinct markings and shading forming expressive short eyebrow; mane and ring on shoulder lighter; fore- and hindlegs without any black marking under the elbows or stifles, except slight pencilling on the toes; black tip of tail; underside of tail and trousers pale silver grey.

**Other coloured Spitz:** The term «other colours» covers all shades of colour, such as : cream, cream-sable, orange-sable, black and tan, and particolour (with white always as main colour). The black, brown, grey or orange patches must be distributed over the whole body.

### **SIZE AND WEIGHT:**

<b><u>Height at the withers:</u></b>	a) Wolfspitz/Keeshond	49 cm +/- 6 cm
	b) Giant Spitz	46 cm +/- 4 cm
	c) Medium size Spitz	34 cm +/- 4 cm
	d) Miniature Spitz	26 cm +/- 3 cm
	e) Toy Spitz/Pomeranian	20 cm +/- 2 cm
	Dogs under 18 cm undesirable.	

**Weight:** Each variety of German Spitz should have a weight corresponding to its size.

**FAULTS:** Any departure from the foregoing points should be considered a fault and the seriousness with which the fault should be regarded should be in exact proportion to its degree and its effect upon the health and welfare of the dog.

**SEVERE FAULTS:**

- Faults in construction.
- Head too flat; distinct apple head.
- Flesh-coloured nose, eyelids and lips.
- In Wolfspitz/Keeshond, Giant Spitz and Medium size Spitz missing teeth.
- Faults in movement.
- In grey-shaded Spitz missing of distinct markings of the face.

**DISQUALIFYING FAULTS:**

- Aggressive or overly shy.
- Any dog clearly showing physical or behavioural abnormalities shall be disqualified.
- Gap in fontanel.
- Over-or undershot bite.
- Ectropion or entropion.
- Semi-pricked ears.
- Definite white patches in all not white Spitz.
- **Any colour that has the merle factor.**

**N.B.:**

- Male animals should have two apparently normal testicles fully descended into the scrotum.
- Only functionally and clinically healthy dogs, with breed typical conformation should be used for breeding.

**The latest amendments are in bold characters.**
